Summary

High-achieving Information Technology graduate (Magna Cum Laude, GPA: 1.42) with practical experience building and deploying full-stack web and mobile applications. Proven ability to deliver production-ready software, including an offline-first mobile app for government internship field operations and a centralized web system for a public high school. Proficient in C#/.NET and PHP/Laravel frameworks

Education

Central Luzon State University, BS in Information Technology – Muñoz, Nueva Ecija July 2022 – May 2026
• GPA: 1.42, Magna Cum Laude

Skills

Languages/Scripts: C#, PHP, JavaScript, Typescript, Python, Java, SQL

Frontend: React, .NET MAUI (XAML), Tailwind CSS, Bootstrap, Alpine.js

Backend: ASP.NET Core, Laravel (Livewire)

Databases: MySQL, Microsoft SQL Server (MS SQL)

Tools & Platforms: Git, GitHub, Visual Studio, VS Code, Figma, Hostinger VPS, AWS

Experience

Philippine Center for Postharvest Development and Mechanization, Intern Jan 2026 – Apr 2026

- Developed and deployed the RAFMES API using ASP.NET Core and MS SQL Server, architecting secure RESTful endpoints designed to scale for a nationwide rollout managing 200,000+ agricultural registrations.
- Engineered an offline-first registration module and QR authentication system for RAFMES Mobile using .NET MAUI, enabling seamless field data collection in remote areas with automated background API synchronization.

Projects

Integrated Learner Records and Services System for San Jose City National High School – SHS | Capstone

Technologies Used: Laravel, Livewire, Alpine.js, Tailwind CSS, MySQL

- Developed and deployed a centralized student-support management system on a Hostinger VPS using Laravel and Livewire, implementing RBAC to secure sensitive records for 2,000 active senior high students.
- Optimized administrative workflows across multiple school departments by engineering dedicated modules for tracking document requests, guidance cases, clinic logs, and client satisfaction metrics.

MotoShopManager (In Development) | Personal Project

Technologies Used: React, ASP.NET Core Web API, MS SQL Server, Tailwind CSS, shadcn/ui

- Architecting a decoupled full-stack web application to digitize motorcycle parts retail operations, building a React frontend dashboard powered by an ASP.NET Core Web API and MS SQL Server
- Implementing secure JWT authentication and secure signup/login routing, with active development on a mobile-friendly, camera-based barcode scanning module for instant price verification

Certifications

- AWS Academy Cloud Foundations Course – AWS Academy (2025)
- iThink Code Camp: Central Luzon State University – Nueva Ecija – ICP HUB Philippines (2024)
